HTML5 Coding Specialization – *University of Michigan* (Coursera)

ABOUT ME

I was born on 12 November 1999 in Isfahan, Iran. I am a social, curious, and dynamic person who loves working and learning with others. I enjoy being part of a team, sharing ideas, and creating something meaningful together. I am enthusiastic about turning the ideas that pop into my mind into real projects and seeing them come to life.
I also have a big love for recent technologies and how they can make life easier and more exciting. I am always looking for ways to improve my life and the lives of others through tech. For me, every day is an opportunity to gain experience, grow, and try something new!

EDUCATION

I began my academic journey by studying Electrical Engineering at the Technical University of Mohajer in Isfahan, where I completed a two-year associate degree. Building on this foundation, I decided to pursue my passion for technology and enrolled at Politecnico di Torino, where I am currently in the final year of a Bachelor's degree program in Computer Engineering. I am on track to graduate in September 2025.
Throughout my studies, I have concentrated on developing strong skills in programming, focusing on Python and Java, as well as database management and development. These areas have allowed me to bridge my interest in engineering with software development, equipping me with both theoretical knowledge and practical problem-solving abilities.

WORK EXPERIENCE

03/2023 - Current
CAPITAN
Just Eat | Turin, Piedmont

- Monitor and ensure that couriers comply with company policies and regulations.
- Gather feedback from couriers and relay it to the company manager for improvements.
- Address and resolve couriers' issues and concerns to ensure their satisfaction and efficiency.
- Act as a key point of contact between couriers and the management team.

11/2020 - 10/2021
Supervisor of electrical equipment
Refinery | Isfahan, Iran

- Supervised the assembly and installation of high-voltage electrical equipment, ensuring adherence to technical standards and safety regulations.
- Provided direct training and mentorship to students during their internships, bridging theoretical knowledge with practical experience.
- Developed and maintained **PLC Programming**, optimizing system functionality and performance.
- Applied academic knowledge to real-world scenarios, contributing to the efficiency and reliability of refinery operations.
